Ramparts is still watching us. Pass it on.

*Ramparts* magazine, which broke the big story, isn't telling everything it knows about the CIA. Not yet. Not until summer 1967, when the editors will disclose everything they've uncovered in a new and startling book to be published by McGraw-Hill.

Over 80% of the book's material has never been published or made public. It's important, disturbing, and full of the stuff headlines are made of. It tells of the ways in which the CIA has infiltrated countless independent organizations — perhaps one to which you belong.
